Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1 – 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peng (5,787,190) in view of Le (5,801,954).
3. Claims 8, 10, 12, 14, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peng as modified by Le in view of Vernon (6,331,711).
4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peng as modified by Le and Vernon as applied to claim 8 above, and further in view of Bojko.
5. Please see the last office action for reasons for rejection. In regards to newly amended claim 10, please see the prior rejection of claim 13 for the full rejection.

Response to Arguments

6. Applicant's arguments filed 10/12/05 have been fully considered but they are not persuasive.
7. In response to applicant's argument that Peng does not teach "mitigating defects associated with delay times", a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. Starting with "to improve" the remainder of claim 1 is intended use and therefore Peng does not need to teach it.

8. In response to applicant's arguments with regards to advanced process control. First the applicant does not provide any support for the definition given from the specification or from prior art. Second, the applicant is entitled to the broadest possible interpretation of the phrase. If the applicant would like to narrow the scope of the phrase then the applicant is encouraged to include part or all of the definition supplied in the remarks (as long as that definition can be shown to be supported by the specification) in the claims. Finally even if the definition provided by the applicant was well known enough in the art to mean only what the applicant described, it still appears to the examiner that Peng (as modified by Le in view of Vernon) teaches an APC application that "detect[s] and identif[ies] process and product deviations and make[s] changes automatically to improve operations." Therefore the examiner has maintained the rejection of newly amended claim 10.

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
